Custom Linux AV: how it is put together

sketched from the files

Custom Linux AV: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GK

Product map: what Custom Linux AV is for

WHAT IT IS

A small project in Markdown, Shell. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: README.md, custom.sh, LICENSE.

WHAT COMES OUT

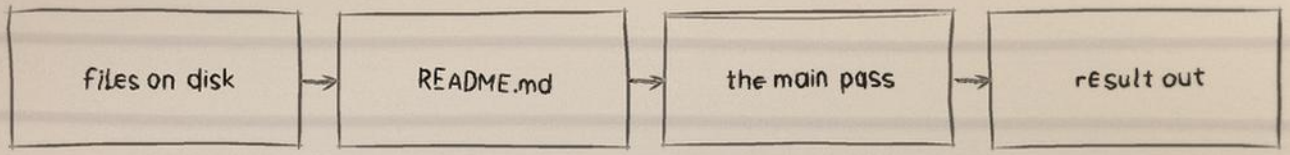

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

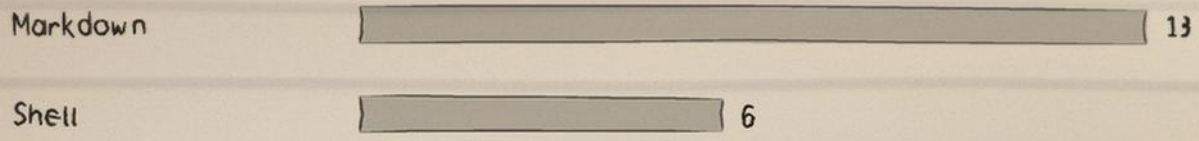

Custom Linux AV: data flow, in one direction

One direction. Anything the code does not do is not drawn.

Custom Linux AV in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.
10 commits, first 2023-05-07, last 2023-05-17, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Custom Linux AV: schematic of the apparatus

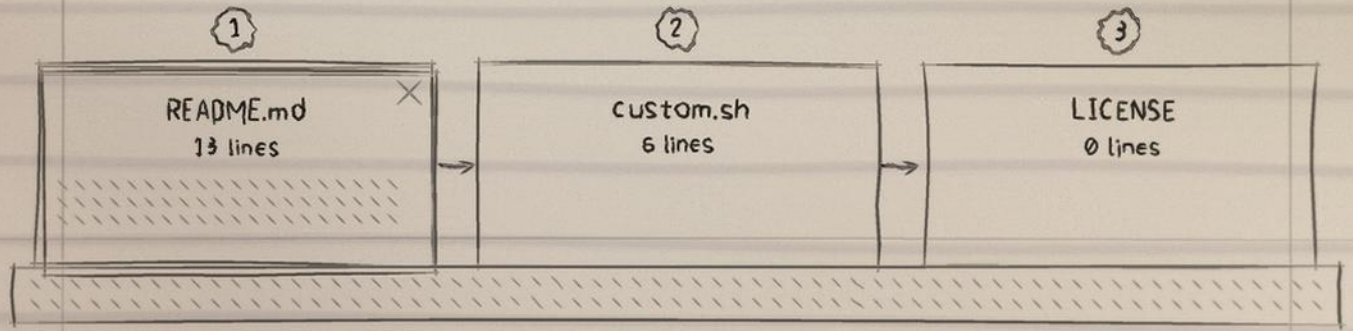

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. README.md
2. custom.sh
3. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 19 lines counted

turns of the crank so far: 10 commits, 2023-05-07 to 2023-05-17

measured and sketched, CK
